SUMMARY

Software Development Engineer with full-stack production experience in REST API design, database architecture, and modern frontend systems. Shipped scalable web applications end-to-end across internships and freelance engagements.

SKILLS

Languages	JavaScript (ES6+), TypeScript, Python, C, HTML5, CSS3
Backend	Node.js, Express.js, FastAPI, REST APIs, Socket.io, NextAuth.js
Frontend	React.js, Next.js (App Router, SSR, SSG), Tailwind CSS, Redux
Databases	MongoDB, PostgreSQL, Supabase, Firebase, Schema Design
Tools	Git, GitHub, Vercel, Postman, Electron.js, Cloudinary, AWS (S3/EC2)

PROFESSIONAL EXPERIENCE

Web Developer Intern

Jan 2026 – May 2026

TVM IT Solution, Remote

- Architected and deployed a production **Node.js/Express.js** backend for the company website (tvmitsolution.com), designing RESTful endpoint structure for reliability and maintainability.
- Engineered a full-stack **Hotel Management System** — designed the database schema, built REST APIs, and delivered a real-time ordering UI with QR-code menus using React.js and Supabase.
- Built RESTful APIs for a **Hospital ERP** covering patient records, appointment scheduling, and billing; developed an Electron.js Admin Dashboard for internal content management.

Frontend Developer Intern

Oct 2025 – Dec 2025

HueBorn, Remote

- Designed a **scalable MongoDB schema** for products, user profiles, and order history; implemented NextAuth.js (OAuth + credentials) for secure, stateless authentication.
- Built a mobile-first e-commerce platform using Next.js, TypeScript, and Tailwind CSS with SSR — reducing time-to-first-byte and improving SEO rankings.

FREELANCE WORK

Freelance Software Developer

2025 – 2026

Independent Clients

- MediaFX-I** (mediafxi.in): Designed and deployed a full-stack agency website with server-side rendered service pages and a contact form backend using Next.js and Tailwind CSS.
- Kota Rankers** (kotarankers.in): Engineered a production Next.js website for a JEE/NEET institute with structured data markup, SEO optimization, and Core Web Vitals tuning.

PROJECTS

Codzy – AI-Powered Static Website Generator

Feb 2025 – Oct 2025

MERN Stack, Meta LLaMA, Vite, REST API

- Built a full-stack no-code platform integrating Meta LLaMA via REST API to generate site layouts from prompts; engineered an SEO scoring engine and MongoDB-backed export pipeline for production-ready static builds.

AquaHumanizer Pro – AI Text Enhancement Platform

2025

Next.js, FastAPI, Hugging Face, Python [Live Demo](#)

- Architected a **FastAPI microservice** integrating Hugging Face NLP models for text transformation; built a Next.js frontend with multiple output modes consuming the Python backend via REST.

DocX – Document & Image Processing Utility

Feb 2025

React.js, Tailwind CSS, Tesseract.js, PDF-lib

- Engineered a fully client-side document processing tool supporting PDF merge/split, OCR via Tesseract.js, and image compression — zero server-side data transmission; automated CI/CD via GitHub Actions on Vercel.

EDUCATION

2022–2026 B.Tech – Electronics and Computer Engineering

Expected May 2026

Maharashtra Institute of Technology, Chh. Sambhajinagar

2022 XII – Science Stream, Mahatma Fule Jr. College, Warud

2020 SSC – NTR High School, Warud
